

# Linux on the Zynq Platform

Linux for  
Embedded  
Objects 2

Thomas S.  
Christensen,  
Mikkel S.  
Jaedicke

Disposition

Motivation

Zynq Platform

Boot Process

Cross  
Compilation

Disposition:

- **Motivation**
- **Zynq Platform**
- **Boot Process**
- **Cross Compilation**

# Motivation

Linux for  
Embedded  
Objects 2

Thomas S.  
Christensen,  
Mikkel S.  
Jaedicke

Disposition

Motivation

Zynq Platform

Boot Process

Cross  
Compilation

- Customizability
- Efficiency on a changing platform
- Knowledge about the platform

# Zynq Platform

Linux for  
Embedded  
Objects 2

Thomas S.  
Christensen,  
Mikkel S.  
Jaedicke

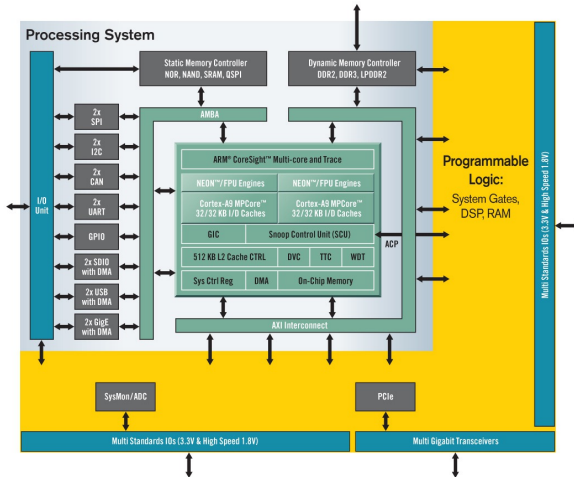

Disposition

Motivation

Zynq Platform

Boot Process

Cross  
Compilation

# The Zynq Boot Process

Linux for  
Embedded  
Objects 2

Thomas S.  
Christensen,  
Mikkel S.  
Jaedicke

Disposition

Motivation

Zynq Platform

Boot Process

Cross  
Compilation

# Stage 0 - Boot ROM

Linux for  
Embedded  
Objects 2

Thomas S.  
Christensen,  
Mikkel S.  
Jaedicke

Disposition

Motivation

Zynq Platform

Boot Process

Cross  
Compilation

- Hardcoded
- Determines the boot mode
- Loads FSBL into OCM

# Stage 1 - First-Stage Boot Loader

Linux for  
Embedded  
Objects 2

Thomas S.  
Christensen,  
Mikkel S.  
Jaedicke

Disposition

Motivation

Zynq Platform

Boot Process

Cross  
Compilation

- PS and PL configuration
- Loads SSBL into DDR RAM

# Stage 2 - Second-Stage Boot Loader

Linux for  
Embedded  
Objects 2

Thomas S.  
Christensen,  
Mikkel S.  
Jaedicke

Disposition

Motivation

Zynq Platform

Boot Process

Cross  
Compilation

- Bare-metal application
- U-Boot
- Loads device tree to memory
- Loads the kernel image into memory
- Initialises execution of the Linux kernel

# The Boot Image

Linux for  
Embedded  
Objects 2

Thomas S.  
Christensen,  
Mikkel S.  
Jaedicke

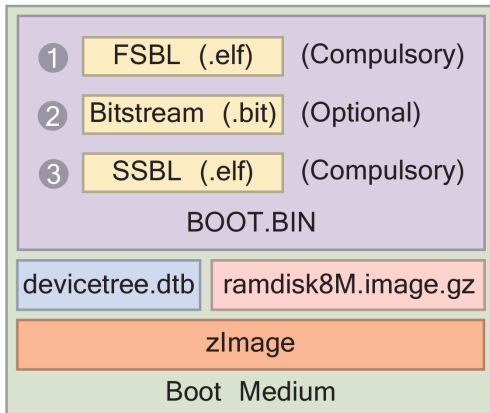

Disposition

Motivation

Zynq Platform

Boot Process

Cross  
Compilation

# Cross Compilation

Linux for  
Embedded  
Objects 2

Thomas S.  
Christensen,  
Mikkel S.  
Jaedicke

Disposition

Motivation

Zynq Platform

Boot Process

Cross  
Compilation

- Why?
- The cross compilation toolchain
- Compilation of userspace software
- Make!

# Cross Compilation of Kernel Modules

Linux for  
Embedded  
Objects 2

Thomas S.  
Christensen,  
Mikkel S.  
Jaedicke

Disposition

Motivation

Zynq Platform

Boot Process

Cross  
Compilation

```
export ARCH:=arm
export CROSS_COMPILE:=arm-xilinx-linux-gnueabi-

CC=$(CROSS_COMPILE)gcc

obj-m += simple.o

KDIR := path/to/linux-xlnx-zynmp-dt-fixes-for-4.10
PWD      := $(shell pwd)

default:
    ${MAKE} -C ${KDIR} M=${PWD} modules

clean:
    ${MAKE} -C ${KDIR} M=${PWD} clean
```
